NOTE

- Positioning precision for keyway milling is determined by sight.
- Contact Miki Pulley when the keyway requires a positioning precision.
- Set screws are included with the product.
- Contact Miki Pulley regarding technical documentation for standard dimensions for bore processing other than those given here.

• The bore diameters marked with ● or numbers indicate a standard bore diameter and the respective torque.
 • Bore diameters whose fields contain numbers are restricted in their rated torque by the holding power of the shaft connection component because the bore diameter is small. The numbers indicate the rated torque value [N·m].
